IN THE SPECIFICATION

Please amend page 2, lines 5-12, of the specification as follows:

One of the technologies underlying the World Wide Web is the prospect of using component software technology - the idea of breaking large, complex software applications into a series of pre-built and easily developed, understood, and changed software modules called components - as a means to deliver software solutions much more quickly and at a lower cost (source: DCOM: A business Overview, ~~online at http://www.microsoft.com/ntserver/guide/dcom.asp~~). The goal is to achieve economies of scale for software deployment across the industry.
